

## LATCHING PANIC BUTTON

# PNK-1

Intruder detectors are an important part of SATEL product line. Wide range of motion detectors is completed by other kind of detection devices like acoustic glassbreak detectors, selection of magnetic contacts or impressive range of gas detectors. Continuous research in the detection field lead to constant improvement and introduction of new designs based on breakthrough technologies.

### FEATURES

- triggers panic alarm and remote notification for hold-up situation
- compatibility with all panels supporting NC zones

### TECHNICAL SPECIFICATION

Max switched voltage	160 V
Max switched current	250 mA
Max switched power	5 VA
Dimensions (mm)	40 x 60 x 25

The manufacturer reserves the right to change the specification and technical data of device.  
The picture may vary from the real product.
